All Times U.S. Pacific Time

09:00 am

Event Kick-Off and Welcome

Nicole Segerer, SVP and General Manager at Revenera

09:15 am

OSS compliance in Age of GenAI: Velocity vs Risk

This session will explore how AI coding tools like GitHub Copilot and ChatGPT are accelerating development while introducing hidden open source compliance risks. We'll unpack the licensing challenges of AI-generated code and share practical strategies for managing velocity without sacrificing compliance.

Venkat Ram Donga, Product Management Director at Revenera

Leon Schwartz, Principal at GTC Law Group

Russ Eling, Founder at OSS Consultants

10:00 am

Tivoization 2.0: How EU Radio Regulations Could Lock Down Free Software Again

This session will examine how the EU's Radio Equipment Directive could echo the Tivoization controversy, restricting free software and complicating GPL compliance in embedded devices.

Dr. Andreas Kotulla, Founder and CEO at Bitsea

10:30 am

Product Roadmap

Join us for a product-focused roadmap session where we'll review the key releases of 2025 and share what's ahead for the next year. This talk will highlight new capabilities, outline upcoming priorities, and give you a clear view of where the product is headed.

Venkat Ram Donga, Product Management Director at Revenera

11:00 am

Final Thoughts and Event Wrap-Up
