flexera

App Risk Module for AdminStudio

Find Application Vulnerabilities Automatically

FLEXERA VULNERABILITY REVIEW 2018

Vulnerabilities Detected

19,954

Discovered in
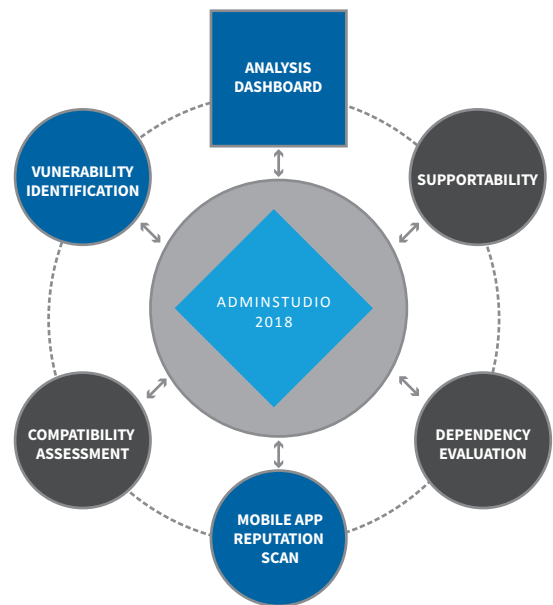

1865

Applications

From

259

Vendors

Results from monitoring more than **55,000** aapplications, appliances, operating systems, and tests, and verifying the reported vulnerabilities.

Don't let application vulnerabilities open the door to business risk. Add App Risk Module to your AdminStudio implementation.

- Take a proactive approach to cybersecurity so your business doesn't fall victim to the next major cybersecurity threat.

- Make ongoing vulnerability assessment and remediation integral to your Application Readiness process

- Stay on top of vulnerabilities with regularly scheduled automatic scans against Flexera's list of thousands of application titles.

- Keep up on the fixes and patches available for known vulnerabilities so you can implement them early to minimize risk

- Provide administrators with intelligence so they can continuously track and identify vulnerable applications and remediate them

12 Secured

App Risk Module for AdminStudio is an add-on to the AdminStudio Enterprise Edition and is licensed via an annual subscription fee based on the number of staff in your organization.
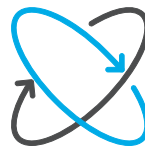

Single Integrated Solution

Vulnerability Identification
Points out vulnerable applications and their criticality, and shows patch availability.

Dependency Evaluation
Indicates Java dependencies and provides detailed dependency information for UWP (APPX) applications.

Supportability Determination
Uncovers potential supportability issues and evaluates application virtualization suitability.

Mobile Application Risk Assessment
Reports the properties and behaviors of iOS, Android, and Windows Universal apps to gauge risk.
