

NEW in FlexNet Code Insight 2018 R2

Create a Bill of Materials – fast and accurately
Manage risk with enhanced vulnerability intelligence
Integrate seamlessly with your DevOps and Build processes

Automatically Create a Bill of Materials

Efficient risk management and IP compliance is dependent on accurate inventory data. FlexNet Code Insight 2018 R2 adds even more automation to your inventory processes. Dial your scan depth up or down based on your risk profile, automatically create a Bill of Materials - with top-level items only or with all direct and transitive dependencies.

Benefit from a fast yet powerful inventory overview, which includes all dependencies.

Reduce Risk with Enhanced Vulnerability Intelligence

FlexNet Code Insight enables 70,000 vulnerability mappings leveraging market-leading vulnerability intelligence from Secunia Research at Flexera and the National Vulnerability Database (NVD).

FlexNet Code Insight provides you with enhanced vulnerability coverage, mapped to your inventory. You'll immediately have insight to the vulnerabilities impacting your applications, along with information regarding severity and priority for remediation.

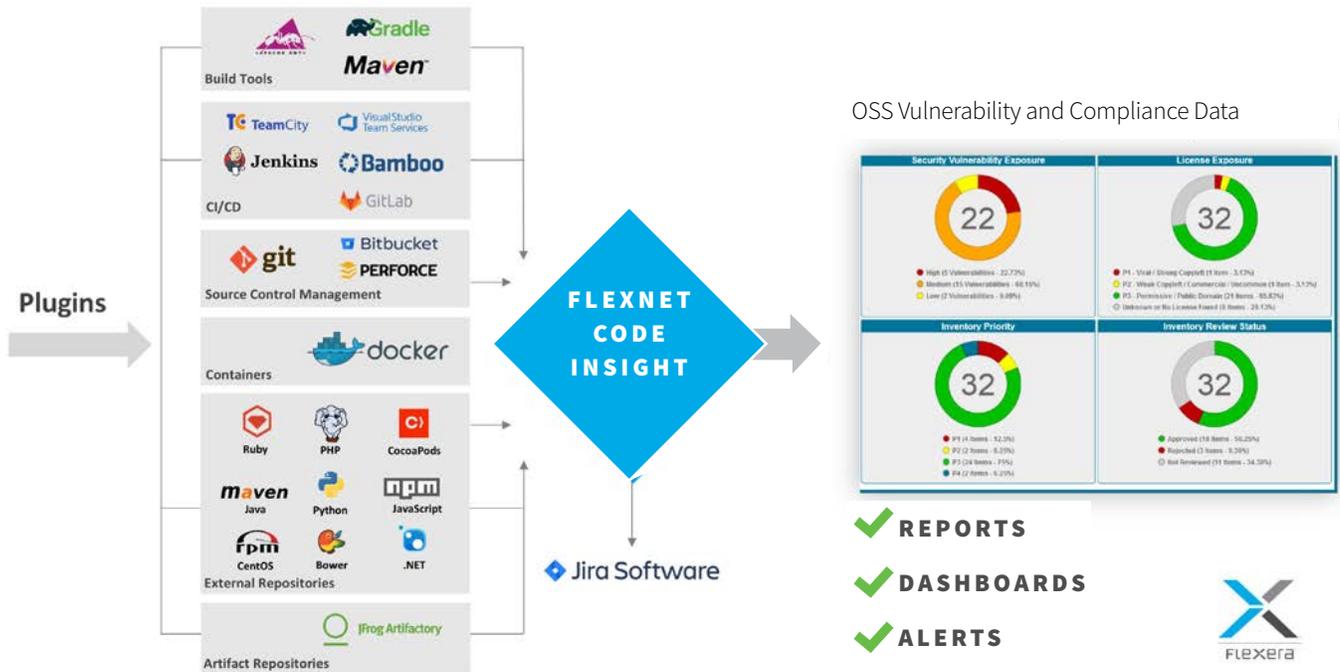

SECURITY POLICIES

add the automation you need to stay secure.

- Reject items based on vulnerability score or severity
- Prevent auto-approvals for items with associated vulnerabilities

Plug in to your DevOps and Build Process

Enable your teams to scan early and often with a centralized Software Composition Analysis platform. A set of integrations makes it easy to integrate FlexNet Code Insight into your development and build processes; and a new Jira plugin enables you to track remediation directly. We also provide a set of REST APIs that enable you to integrate with other tools you might be using.

Get started quickly and integrate FlexNet Code Insight into your Enterprise IT environment. That's easier than ever with LDAP/AD support, GIT/Perforce SCM support and support for proxy connections.

A full enterprise platform for open source security and license compliance, with support for all major software languages, more than 70 extensions and one of the industry's largest knowledge bases with more than 14 million open source components.

ABOUT FLEXERA

Flexera is reimagining the way software is bought, sold, managed and secured. We view the software industry as a supply chain, and make the business of buying and selling software and technology asset data more profitable, secure, and effective.
