

FlexNet Licensing (including FlexNet Publisher and FlexNet Embedded)

1. Definitions.

- a. **“FNL Revenue”** means the sum of (i) all revenue from all sources directly related to the Licensee FNL Software Products recognized in accordance with GAAP during each of Licensee’s fiscal years, including, but not limited to all license, subscription and recurring maintenance and support revenue plus (ii) all revenue from all sources directly related to the Licensee FNL Hardware Products recognized in accordance with GAAP during each of Licensee’s fiscal years, including, but not limited to all license, lease and recurring maintenance and support revenue. FNL Revenues does not include (a) revenue from consulting services related to the implementation, installation, customization or configuration of Licensee FNL Products or (b) revenue from any generic hardware (e.g., a 3rd party blade server) sold alongside a Licensee FNL Product.
 - b. **“Licensee End User”** means a unique combination of a single employee of Licensee and a single device used solely by said employee.
 - c. **“Licensee FNL Hardware Products”** means the hardware products developed by or for Licensee that will be directly or indirectly enabled, protected or managed by FlexNet Licensing. A Licensee hardware product is not a Licensee FNL Hardware Product merely because FlexNet Licensing or a Licensee FNL Software Product is installed upon it; rather a Licensee hardware product must be enabled, protected or managed by FlexNet Licensing for it to be a Licensee FNL Hardware Product.
 - d. **“Licensee FNL Products”** means collectively, the Licensee FNL Software Products and the Licensee FNL Hardware Products.
 - e. **“Licensee FNL Software Products”** means the software application products developed by or for Licensee that will be directly or indirectly enabled, protected or managed by FlexNet Licensing, including, but not limited to any Licensee software that is enabled by the use of a base product that is enabled by FlexNet Licensing (e.g., plugins, APIs, web services, etc.). Licensee FNL Software Products does not include any Licensee software product that, even if sold alongside or bundled with a different Licensee FNL Software Product, can be installed and used in its entirety by an end user without the use and/or installation of a Licensee FNL Software Product.
 - f. **“Platform”** means a separately purchased component of FlexNet Licensing that relates to a unique combination of (i) a development language, (ii) an operating system and (iii) a processor set.
2. **Fiscal Year.** The last month of Licensee’s fiscal year will be established as December. Licensee may request a change by providing a written request to Flexera regarding such change.
3. **Limitations.** Licensee may install and use FlexNet Licensing solely with Licensee FNL Products that generate revenue and that generate FNL Revenue in an amount that does not exceed the License Level.
- a. For any FlexNet Licensing Platforms identified on an Order, invoice or SKU that refer to a number of Licensee End Users on the Order, invoice or SKU, then this section 3.a replaces the above section 3. Licensee may install and use FlexNet Licensing solely with Licensee FNL Products that are distributed internally to Licensee End Users in an amount that does not exceed the License Level. FlexNet Licensing may NOT be installed and used by Licensee on Licensee FNL Products that are distributed to third parties.
4. **Redistributables.** Licensee may copy any files specifically identified in the Documentation as “redistributables” and redistribute such files with Licensee FNL Products to Licensee’s end users of the Licensee FNL Products, provided that: (a) such Licensee FNL Products add primary and substantial functionality to the redistributables, (b) all copies of the redistributables must be exact and unmodified; (c) Licensee grants the end users of its Licensee FNL Products a limited, personal, non-exclusive and non-transferable license to use the redistributables only to the extent required for the permitted operation of the Licensee FNL Products; and (d) Licensee informs Licensee’s end users of the Licensee FNL Products of the connection, collection and dissemination of information between such end users, Licensee and/or Flexera, as applicable. Licensee will reproduce with the redistributables all applicable trademark and copyright notices that accompany FlexNet Licensing and/or redistributables, but Licensee may not use Flexera’s name, logos or trademarks to market Licensee’s products. The termination of any FlexNet Licensing license does not require the removal or deletion of the redistributables from Licensee FNL Products that were distributed prior to the effective date of termination.
5. **No Similar Functionality.** Licensee will not use FlexNet Licensing with a Licensee product where the primary functionality of such Licensee product when taken as a whole is substantially similar to the functionality of FlexNet Licensing.
6. **Vendor Daemon.** For any FlexNet Publisher Platforms identified on an Order, invoice or SKU, Flexera will select an available Vendor Daemon for Licensee. The Vendor Daemon name is used in FlexNet Publisher to differentiate Licensee’s software from other vendors’

software. The Vendor Daemon will be no more than eight characters; consist of only alphanumeric characters; not be mixed case.

7. Reference Linux Platforms.

- a. FlexNet Publisher. For any FlexNet Publisher Platforms identified on an Order, invoice or SKU, that include the phrase “reference Linux” in its name on the Order, invoice or SKU, (the “FlexNet Publisher Reference Linux Platforms”), Licensee may implement such FlexNet Publisher Reference Linux Platform(s) on the processor set listed in the Platform name in combination with any LSB 3.0 and higher certified Linux operating systems other than any of the Linux operating system platforms available from Flexera as of the date of the applicable Order. For the avoidance of doubt, “LSB” means “Linux Standard Base.” Support is only available on the FlexNet Publisher Reference Linux Platforms licensed regardless of the LSB Linux platform on which Licensee implements FlexNet Publisher. Accordingly, all requests for support related to an LSB Linux platform must be reproducible by Licensee on the licensed FlexNet Publisher Reference Linux Platform. In the event the support request is reproducible on the FlexNet Publisher Reference Linux Platform, Flexera will provide support to Licensee. In the event the support request is not reproducible on the FlexNet Publisher Reference Linux Platform, Flexera will have no obligation to provide support to Licensee with respect to such request.
- b. FlexNet Embedded. For any FlexNet Embedded Platforms identified on an Order, invoice or SKU that include the phrase “reference Linux” in its name on the Order, invoice or SKU (the “FlexNet Embedded Reference Linux Platforms”), Licensee may implement such Platform(s) on the processor set listed in the FlexNet Embedded Reference Linux Platform name in combination with any Linux operating systems other than any of the Linux operating systems platforms available from Flexera as of the date of the applicable Order. Support is only available on the FlexNet Embedded Reference Linux Platforms licensed regardless of the Linux platform on which Licensee implements FlexNet Embedded. Accordingly, all requests for support related to a Linux platform must be reproducible by Licensee on the licensed FlexNet Embedded Reference Linux Platform. In the event the support request is reproducible on the FlexNet Embedded Reference Linux Platform, Flexera will provide support to Licensee. In the event the support request is not reproducible on the FlexNet Embedded Reference Linux Platform, Flexera will have no obligation to provide support to Licensee with respect to such request.

8. Porting Kits.

- a. For any FlexNet Embedded Porting Kit identified on an Order, invoice or SKU, Licensee is granted the right to use the FlexNet Embedded Porting Kit in order to port the FlexNet Embedded to any platform other than a FlexNet Embedded Platform available from Flexera at the time of purchase (each a “Licensee Ported Platform”). Licensee acknowledges that Flexera will retain all ownership in and to the FlexNet Embedded Porting Kit and the port to the Licensee Ported Platform(s).
- b. Licensee understands and acknowledges that Support is only available on the FlexNet Embedded Platform(s) licensed and will not be provided for any Licensee Ported Platforms. Accordingly, all requests for support on the Licensee Ported Platforms must be reproducible by Licensee on the FlexNet Embedded Platform(s) licensed or, if no FlexNet Embedded Platform is licensed, on one of the CentOS or Debian Linux FlexNet Embedded Platforms available as of the date of the request for support (each a “FlexNet Embedded Reference Platform”). In the event the support request is reproducible on an applicable FlexNet Embedded Reference Platform, Flexera will provide support to Licensee. In the event the support request is not reproducible on an applicable FlexNet Embedded Reference Platform, Flexera will have no obligation to provide support to Licensee with respect to such request.

9. Platforms and Modules. These FlexNet Licensing terms and conditions shall apply to any Platforms or modules licensed in conjunction with FlexNet Licensing (including either or both FlexNet Publisher and FlexNet Embedded).

10. Software. For the purpose of the Agreement, FlexNet Licensing is considered “Software”.
