

FlexWrap

1. **“FlexWrap Author”** means the individual within Licensee’s organization who accesses FlexWrap for preparing internal software applications to have FlexNet licensing capabilities, which includes, but is not limited to, optional enforcement of concurrent limits on application usage. For the purpose of certification as set forth in the Agreement, the number of FlexWrap Authors includes all FlexWrap Authors who accessed FlexWrap at any point during the previous year. For the purpose of clarity, a single FlexWrap Author may not be more than one individual.
 2. Each license for FlexWrap permits the “wrapping” of an unlimited number of internally used applications to provide FlexNet licensing capabilities for such applications and a license server to manage license check-ins and check-outs for these applications. FlexWrap provides application usage management and optional enforcement of concurrent limits on application usage. The license server may be installed on a single named server identified by a HostID. A set of redundant servers is considered a “single named server” for the purpose of this license. This license does not permit applications to be wrapped and distributed externally to any other parties. FlexWrap may be used by the total number of FlexWrap Authors within Licensee’s organization, and only if that total number of FlexWrap Authors does not exceed the License Level set forth in the Order.
 3. **Internal Purposes.** The license granted hereunder is for the purpose of managing applications located within Licensee’s (including Affiliates) own systems. Management of applications of any third party shall require a separate license.
 4. **Software.** For the purpose of the Agreement, FlexWrap is considered “Software”.
