

Technology value optimization at your fingertips

Technology is evolving, and IT is taking note. Seventy-four percent of organizations listed digital transformation as their top priority in the *Flexera 2022 Tech Spend Pulse* report, followed by cybersecurity (73 percent) and cloud/cloud migration (65 percent). As more of your IT spend moves to SaaS and the cloud, it's time to take a holistic approach to maximizing the value of your technology.

However, according to the *Flexera 2022 State of ITAM Report*, 74 percent of respondents are challenged finding ways to optimize software

use. As top vendors like Microsoft, Oracle, SAP, IBM and VMware span on-premises, SaaS and the cloud, vendor negotiation for a single contract becomes even more complex. You can no longer afford to take a siloed approach to vendor spend if you expect to be negotiation ready.

Flexera One enables your organization to evolve beyond traditional software spend to managing SaaS subscriptions and cloud spend. You gain additional capabilities, including SaaS management, a powerful policy engine and a modern user experience.

Increase the return on your IT investments

Flexera One's IT Visibility, IT Asset Management and Cloud optimization solutions help you gain more business value from every tech dollar you spend.

← Technology Value Optimization →

IT Asset Management

- Software license optimization

Cloud optimization

- Cloud cost assessment
- Cloud cost optimization
- Policy-based governance
- Cloud migration planning
- Workload placement

Technology insights built on Technopedia

Visibility | Normalization | Research | Integration | Automation | API

Unprecedented visibility, unparalleled benefits

Gain improved user experience, an enhanced user interface, modern navigation and innovative capabilities like vendor workspaces.

Optimize more strategic vendors

ORACLE®

vmware®

Flexera SaaS Management is included in Flexera One ITAM conversions

SaaS cost optimization

Governing and planning SaaS spend, identifying waste from unused SaaS

SaaS visibility

Enterprise-wide catalog of sanctioned and unsanctioned SaaS

SaaS security

Identify and remediate unauthorized access to SaaS applications and data

Focus on the biggest SaaS spend

Deep integration with Salesforce

User, Features and Permissions licenses
Intuitive view across all SF.com orgs

Only Flexera SaaS Manager solves this challenge today

Tracks consumption based upon usage of contacts and messaging

Hybrid use rights

Identify licenses eligible for Azure Hybrid Use Rights to save costs

SQL Server

Windows Server

Linux Server

Benefit	Flexera One
IT intelligence	250+ million technology data points on 4.9+ million hardware and software products from 100,000 manufacturers
Technology portfolio governance	Manage technology lifecycle risks, identify redundant investments and rationalization opportunities
Unprecedented visibility	View your IT estate with unified data discovery and identification, inventory and normalization
Visualizations and reporting	More visual analytics, including unified technology spend and vendor workspaces
Automatic feature delivery	As available, enabling our customers to receive enhancements sooner than on-premises
Administrative costs	SaaS-based delivery reduces overhead for administration and upgrades
User experience	Modern UX, including consistent user interface across applications and intuitive visualizations
Integrations	More out-of-the-box integrations, including ServiceNow, AWS, Azure and Coupa
Extensibility	API libraries and additional capabilities to share valuable data with your IT ecosystem
Orchestration and automation	Hundreds of out-of-the-box policies to take automated action (e.g., reclaim a SaaS license) with faster time to value

Flexera One optimizes your licences and subscriptions

LICENSED SOFTWARE	SAAS SUBSCRIPTIONS
<input checked="" type="checkbox"/> Renewal reminders	<input checked="" type="checkbox"/> Renewal reminders
